

The Scholar Journal for Sciences & Technology

Northern European Academy – Denmark

Editorial

Prof. Dr. Harith Salman Hasaani

After here we meet with you in the first number of the Scholar Journal for Sciences & Technologic, which we hope to be a lamp illuminating, For students of science everywhere, They receive the science and knowledge they need. We are optimistic that we are on track to achieve the objectives of the Nordic Academy And its scientific journal, the dissemination of knowledge and the real information and provide it to anyone looking for it, and since it is difficult for any Journal to draw its features and determine its destination since the first issue, but we are trying to provide the basic indicators of ambition and direction in the way of culture long and difficult by careful to complete the requirements of scientific research sound in the published research and studies.

It is no exaggeration to say that the publication of a new scientific journal insisting and insisting on the availability of safety conditions and accuracy in its production of the first issue is to enter into a risk-free adventure at a time of explosion and decline in many of the concepts, visions and ethical values of scientific research, But the concern and emphasis on scientific values sound and correct despite the difficulty was and will remain the hope and goal of scientists and noble values at all times and places, And so it has been confirmed to achieve the conditions of publication specified in everything that is published, regardless of the reactions to maintain our balance of original researchers and students of science from the correct sources, it is not wise to collect a large number of writers and publishers, But the wisdom to attract diligent and diligent researchers, no matter how few they are, only a few who owe them credit in the antithesis of science and few owe them thanks to the enlightenment of humanity and guidance.
